Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 7-10, 13-17 and 19-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ganther, Jr. et al. (6420868) in view of Hirano et al. (6498483). Ganther Jr. et al discloses substantially the same invention as claimed, except for the FLL not being an unmodulated FLL. Hirano et al discloses a FLL in an unmodulation mode in order to provide a device and a method for adjusting a working point of a non-modulation type SQUID which improve precision of SQUID adjustment and enable automatic adjustment. See col.2 lines 60-64. It would have been obvious to one of ordinary skill in the art to modify Ganther Jr et al by employing an unmodulated FLL in order to provide a device and a method for adjusting a working point of a non-modulation type SQUID which improve precision of SQUID adjustment and enable automatic adjustment.

Claims 1-4, 7-10, 13-17 and 19-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ganther, Jr. et al. (6448767) in view of Hirano et al. (6498483). Ganther Jr. et al discloses substantially the same invention as claimed, except for the FLL not being an unmodulated FLL (see Fig.1). Hirano et al discloses a FLL in an

Although specific columns, figures, reference numerals, lines of the reference(s), etc. have been referred to, Applicant should consider the entire applied prior art reference(s).

Allowable Subject Matter

Claims 5-6, 11-12 and 18 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
